

I am here to support jailbreaking of smartphones/tablets. I am user of a jailbroken Apple iPhone.

Jailbreaking has allowed me to make the interface of my phone much easier, and look as I would like it to look. I've been able to download third party apps that are not in the App Store, Apps like Display Recording, which give me the ability to record the screen of my phone while I play a game. I use this to support a gaming channel on Youtube. I also use this jailbreak to change the look of my phone. I can add themes to my phone, the font, lockscreen, ect. I do not use this to steal apps, I support everyone that takes the time to make apps for all the iPhone users.

PLEASE DO NOT make jailbreaking illegal, It is not illegal now and I don't see a reason to make it illegal. so many people use jailbreaking and all would be disappointed if you passed this law.
