

David Salant  
Class 5 (iphone, ipad)

Without a "jailbreak" for these devices:

I cannot put more icons onto the dock, stationary bottom bar, than Apple will allow. Their maximum allowance seems arbitrary and is unnecessarily restrictive.

I have to navigate through many menu screens just to turn on/off things like wifi, 3g, data, airplane mode. (with jailbreak these toggles are at my fingertips)

I cannot download and manage files on my phone.

I cannot easily create and utilize ringtones and other alert sounds.

These are but a few reasons why I need to jailbreak my phone and tablet
