I am supporting the jailbreaking of smartphones/tablets

I am a user and an independent researcher

These are the following devices that I would like to be able to jailbreak: iPhone, iPod, iPad, Android OS, Blackberry OS, Computer OS.Any other media or storage device.

If I do not jailbreak, I would lose my internship, my YouTube status, quick messaging to any of my friends/family, customization of my device, using a better GUI, being able to manage what I use, use Siri with awesome commands, and be able to secure my device
