

Please allow rooting of phones to still be legal.

I root my Android phone so I can have lower/higher levels of access for some of the apps that I write as well as my company writes for the US Army.

I am a defense contractor for the US Army and I work in the Military SATCOM Field. I'm a Systems Engineer.

If phones are not allowed to be rooted, this would put a damper on the productivity of the apps that I, as well as my company and other companies, develop. We need to stay legal on this matter. We have purchased it, but we can't be restricted of certain functions that are ONLY accessible to the Carrier or Manufacturer.

Please keep this option legal.

Sincerely,

Jeffrey W Tarman
Systems Engineer
General Dynamics C4 Systems
