

I am supporting the jailbreaking of smartphones/tablets and gamesystems.

I am a user, an independent researcher, and soon to be a developer.

These are the following devices that I would like to be able to jailbreak: iPhone, iPod, iPad

If I do not jailbreak, I would lose quick messaging to any of my friends/family, customization of my device, using a better GUI, being able to manage what I use, use Siri with awesome commands, and be able to secure my device, as well as losing the option to further my programming career.
