

MannyOhh

Class of works I specifically support #3 and #5

#3 I believe that people that wish to install their own software in their video game consoles should be able to do it as long as it's not hurting other people.

#5 I'm both a user of Apple's iPhone and iPad and I support the jailbreaking of smartphone and tablets because jailbreaking creates innovating apps that could potentially lead to revolutionary ideas. From simple tweaks to well-developed apps that make my life easier and fun, I know that I would really hate to lose the option to legally jailbreak my smartphones and tablets.

Please Copyright Office do not make it illegal to jailbreak out devices and Thanks for listening to me :)
