

Jailbreaking is not a crime, seriously. I support jailbreaking for smartphones/ tablets and video game consoles. Im a user, I want to make sure I can be able to jailbreak my iPhone. It provides so much more then what apple gives your pre installed. You can change themes, customize your device in thousands of ways, make your device unique, isn't that what its all about? Everyone wants their own unique touch to their device and not just be boring like apple gives it to you.
