

I Eric N. Burns,

Do not think this is the right thing to do.

I have been working on getting my father , Mr. John Luther Burns A.K.A Art Seigner Material protected under copyright for over 20 years. I have yet to receive a dime from any of the work such as Soul And Soledad an interview with Angela Davis. By putting any other work in public domain would be stealing from me and my kids. That would be like robbing us of our father and their grandfather it is not right. The big record companies have been doing this for decades. These recordings are our personal property not to be taken and given to anyone for free. If someone wants a recording they should be made to pay for it not steal it. Please keep all copyright protection on all work for that reason. People don't work that hard for free and to make recording that are pre 1972 public domain is wrong.

Mr. Eric N. Burns
