

Name: James Jones

Class of works: I am writing in support of Class #1 (Copy-Protected CDs):
Sound recordings released on compact disc ("CDs") that are protected by
technological protection measures that malfunction so as to prevent access on
certain playback devices.

Summary:

Disc name: Home by the Dixie Chicks

I am requesting an exemption for copy protection so I can play the legally
purchased CD "Home" by the Dixie Chicks in my home.

First issue: Putting the CD into my CD-RW and attempting to mount it resulted
in this error: [kernel] sr0: CDRom not ready. Make sure there is a disc in the
drive. So I put the CD into my computer's DVD-ROM drive. Doing so allowed my
computer to "read" it, but when I attempted to play it, each track would only
play for one second.

Second issue: My legally purchased CD "Home" would play in the CD player in my
car, but would not play in my computer-based home stereo.

Conclusion: So, I am in possession of a legally purchased audio CD "Home" that
will NOT play in my home.
