

## Comment on Exemption to Prohibition on Circumvention of Copyright Protection Systems for Access Control Technologies

To Whom It May Concern,

Circumvention of copyright protection systems (CPS) should be permitted for any and all non-copyright-infringing purposes. For clarity, two purposes in particular should be specifically called out (but without limiting other non-copyright infringing purposes):

- 1) Circumvention of CPS for the purpose of making backups of legally acquired material.
- 2) Circumvention of CPS for the purpose of personally reading (or listening or viewing) legally acquired material in a format or on a device of the user's choice.
