Please DO NOT make jailbreaking, unlocking and/or rooting smartphones, tablets and video game consoles illegal.
I believe i'm entitled to modify a product to match my requirements, once i've paid the money for it.
It's like tuning a car, remapping it's ECU and doing all kinds of crazy stuff to it, so that you like it more and make it uniquely yours.
Please don't forbid us from having unique devices, we're in an age where this shouldn't even be a concern. More important matters should occupy our thoughts, like increasing fuel prices, or unemployed people...
I hope you guys take this seriously and do a good thing for the whole world.
Sincerely, Alex Matei.
