

I am a full supporter of the jailbreaking of iPhones, iPods, iPads, and other smartphones/ tablets. I have been a user of a jailbroken iPhone ever since the beginning and it is such a benefit to be able to have these device jailbroken. If these devices weren't jailbroken, my productivity level would not be as high as it is, and it is very helpful in many organizational aspects. Please keep the jailbreaking of these devices legal, it is very important to me and many other people. Thank you for your time,
Connor.
