

Im am concerned with the renewal od DMCA regarding modification of category 3,4, and 5.

As an owner of these products, I would like to be able to legally continue to use each product as I feel fit.

I do not want to be branded a criminal for modify or customizing these expensive products that I have save my hard earn dollars to purchase.

I would like to continue rooting my phone to unlock capability that the original manufacture has locked away from me, knowing full well that by doing so, I will have to void my warranty. Is that not enough? I want to continue modifying my computer system knowing full well that it would void my warranty. Is that not enough? I want to be able to exchange parts in my car, customize it to make it uniquely mine knowing that it would void my warranty. Is that not enough? Must I break the law to customize what I paid for? Is it not ludicrous to be branded a criminal for such things?
