

My name is Jeremy Davis.

I am supporting the jailbreaking exception of apple iPhones.

I am a hobbyist, and user.

I want to ensure that I have the legal authority to jailbreak this and future devices.

I selected the iPhone as my smartphone BECAUSE I knew I could jailbreak it – the simplified user interface is fine for all the grandmas who just want to check their email and take/show pictures of their grandkids to each other, but for the tech-savvy younger generations, this oversimplified OS (iOS) SEVERELY limits the usefulness of the device. Before iOS5 was jailbroken, I preferred to stay with jailbroken version (antiquated firmware) that could help me utilize the phone to its full capabilities. Particularly, my ALL TIME FAVORITE app is “BiteSMS” where I can reply to text messages without leaving the application I’m in (apple, for some stupid reason, takes you [unnecessarily] to the messaging app). Apple makes a great product. Jailbreaking makes it perfect.

Please ensure that jailbreaking is legal.

Thank you.
