Jailbreaking

Class 5

I support the jailbreaking of smartphone/tablets because I am a hobbyist and jail breaking my own phone that I paid full price for has helped me learn how to do minor programming and has helped me in my field of study. I have used my iPhone for years to study programming and wish to continue with the aid of jailbreaking. I have never used jail breaking to pirate anything or to write malicious coding just for learning and giving my phone the usability the maker has not given it.
