

To Whom It May Concern At The Copyright Office:

It is important to me to keep the jailbreaking ability freely available. The main reason is so that I can continue to use my iPhone overseas without being tied to the overpriced structure dictated to me by AT&T. Once I'm overseas, I should be able to purchase a local SIM card and use my phone.

I pay my monthly fees to AT&T per the contract agreements. However, that shouldn't prohibit me from using the device I own in the way I want to, when I want to.

Sincerely,  
/Thomas Tong
