### **Exemption to Prohibition on Circumvention of Copyright Protection Systems for Access Control Technologies**

I support the exemption to allow jailbreaking for smartphones, tablets and video game consoles. I am an enthusiast, hobbyist and educator. I currently use a Samsung Epic 4G (SPH-D700), and feel that it is my American right to continue to utilize my paid device, in which I own, in a manner which I choose. I wish to ensure that I have the legal authority to jailbreak this device as well as future tablets, smartphones and game consoles.

If I weren't able to jailbreak my phone, I would be greatly limited in battery life, I wouldn't be able to maximize my battery life. I wouldn't be able to utilize my smartphone to play games that are made for it b/c my cpu processor (at stock speeds) would be too slow. I wouldn't be able to customize my phone, which **I feel is an extension of my 1<sup>st</sup> amendment right to freedom of speech and expression**, with great graphics and fonts that I can't understand half the time. I wouldn't be able to convert my applications to my memory card and in turn allow me to purchase more apps from the market. **NOT ALLOWING US TO JAILBREAK OUR PHONES WILL HELP HURT OUR ECONOMY.**

**PLEASE Continue to allow us the LIBERTY and FREEDOM we have in the great country to express ourselves by Jailbreaking our smartphones, tablets and video game consoles.**

Regards,

**Willie Scott**
