

Please deny the Association of Global Automakers' criminally actionable request to remove the DMCA exemption for motor vehicle diagnosis and repair. In addition to blatantly allowing for criminally unfair competition against non-dealer mechanics under the Sherman Antitrust Act, removing the exemption would cause a chilling effect on auto repair, potentially creating unsafe conditions on our already dangerous roads.

In addition, please refer the automakers who compose the Association of Global Automakers to the FTC and Congress for the maximum allowable fines under current antitrust law. Don't let them get away with ripping off car buyers and mechanics. Make an example of them.
