The DMCA was enacted to prevent software piracy. It should NOT be applied for persons wishing to modify the code in the on-board computer in private citizen's automobiles, either by the owner or by his/her selected mechanic. Personally, I have had mixed experience with auto dealerships (in the most recent of which the body shop manager told me I needed to replace a part which was not broken.) However, I have a mechanic I trust. Should I want to modify the software in the vehicle I paid for, I should be permitted.
