To Whom It May Concern,

I am writing on behalf of all the Linux users in the world. If someone wants to buy a movie on a DVD and run the Linux operating system, we are out of luck, because the companies that make DVDs will not make a good player for Linux. Finally, somebody did, and now he's being sued, along with everybody who was distributing the source code to this program.

I don't think this is right. I don't call this freedom. Please stop the MPAA.

Sincerely,
John W. Davison
