Best Edition
of Published Copyrighted Works for the Collections of the Library of Congress

When you submit a copyright registration or comply with the mandatory deposit provision in the copyright law for a U.S. work published in multiple editions or formats, you may be required to submit the “best edition” of your work. If your work is published in two or more of the formats listed in this circular, you must submit the format of highest quality.

When you register your published work or comply with the mandatory deposit requirement, you must submit copies of your work consistent with Copyright Office regulations. In certain situations, those copies must comply with the requirement to deposit the “best edition” of a work from among multiple editions of the work available at the time of registration. The law defines “best edition” as “the edition, published in the United States at any time before the date of deposit, that the Library of Congress determines to be most suitable for its purposes.” In general, a work is published when an authorized copy is sold or offered for distribution to the public.

The criteria used to identify the best edition for a particular work are listed in the Best Edition Statement. It is responsibility of the copyright owner to identify the “best edition” that exists at the time of submission.

If your work was first published outside the United States, you may submit the work either as first published or the best edition. A work simultaneously published within and outside the United States is considered first published in the United States. For more information, see chapter 1500, section 1511.4 of the Compendium of U.S. Copyright Office Practices.

The best edition requirement does not apply to all deposits. In particular, the following types of works are exempt from the best edition requirement:

• Unpublished works
• Works published solely in editions or formats not listed in the Best Edition Statement
• Most works that are published only online

A work exempt from the best edition requirement is not exempt from the deposit requirements for copyright registration. For more information about the deposit requirements for registration, see Copyright Registration (Circular 2).
It is the responsibility of the copyright owner to identify the “best edition” that exists at the time of submission. To identify the best edition of a particular work, consult the criteria in the Best Edition Statement below. The “best” edition generally will be the highest quality edition that is publicly circulated. Under Copyright Office regulations, when “judging quality, the Library of Congress will adhere to the criteria set forth [in the Best Edition Statement] in all but exceptional cases.” For example, if both a digital and a physical edition of a work were published before the date of the deposit, the physical edition should be submitted.

**NOTE:** An owner need not create a new edition of a work solely to comply with the best edition requirement. Whatever edition was published in the United States at the time of deposit is the version that should be submitted. Likewise, if there are multiple editions of a work, but none of those editions are listed on the Best Edition Statement, you may submit any published edition that exists as of the date the claim is filed.

Under certain circumstances, the Copyright Office may grant a written request for special relief from the best edition requirement. For more information about special relief, see chapter 1500, section 1511.9, of the *Compendium of U.S. Copyright Office Practices.*
