

I am voicing my disagreement with the proposed increase in Copyright Office filing fees.

I own a small publishing company that employs a few editors to produce our newsletters. We publish 9 times a month.

The proposed 86% increase (\$585 per month, up from \$315 per month), presents enough of a hardship to make us reconsider the value of copyrighting our publications.

This is too high an increase to put on small business. Please re-consider.
