This is the total number of DSEs used to compute the surcharge.</p> <p><b>Step 4:</b> Compute the surcharge for each subscriber group using the formula outlined in block D, section 3 or 4 of part 7 of this schedule. In making this computation, use gross receipts figures applicable to the particular group. You do not need to show your actual calculations on this form.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                            |  |

This is the total number of DSEs used to compute the surcharge.</p> <p><b>Step 4:</b> Compute the surcharge for each subscriber group using the formula outlined in block D, section 3 or 4 of part 7 of this schedule. In making this computation, use gross receipts figures applicable to the particular group. You do not need to show your actual calculations on this form.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                            |  |
