

To the U.S. Copyright Office regarding “Orphan Works”

My name is Christopher Gabriel Nelson, I am a performing musician and composer of music. I have had music published and am a member of BMI and a proponent of the CCC. In regards to the issue of “Orphan Works” and the proposed solution that Google should be granted the right to assume possession of these copyrights, I stand in opposition to this idea. I would like to ask that a solution that benefits the music community be created rather than a solution that benefits a private company. Thank you for your time. CGNelson 916 384 7650
